With guest consignors  
Udell Cattle Company  
& Dostal Cattle

WELCOME to our 12th annual bull sale. It is with great pride that we bring you this set of bulls. In the 12 years that we have been having a bull sale, there is no doubt that this is the best offering that we have ever sold – bar none. Once again we would like to welcome the Dostal family who has sold bulls with us for several years and a new addition is Udell Cattle from Sioux City. They are certainly no strangers to high quality cattle and they are committed to the purebred cattle industry.

We are the first to realize that the agricultural markets have been less than favorable for the last couple years. With that, there is no better time than right now to purchase a high quality bull to maximize your profits when taking your calf crop across the scale or producing your next set of replacement heifers. When going to the field in the spring we make sure that we plant the right seed, fertilize the right amount at the proper time, and control the weeds so that we can maximize the potential of each acre of ground that we have. With out a doubt we feel that the bulls in this sale will do just what the proper seed, proper fertilizer and spraying will do. They will maximize your production per cow and pounds per acre of grass. I do not believe that there is a lending agency around that would not tell you to maximize your production. I does not matter if it is with you livestock or plants and even in these times of unstable markets.

The bulls that these three operations have to offer for sale will help you to make a return on your investment. We say that with confidence. It has always been our philosophy that if these bulls are not good enough to turn out on our cows, why should you. Our goals are simple, we want to every year have a better calf crop than last year. Hopefully with a little luck along the way we will continue to do so. Our cows have to work for us, these bulls are bred to work for you.

If there is anything we can do to assist you or if you have any questions, please call.

Sincerely,

Wayne & Barb

**\*\*\*\*We are offering \$100 per head off of each lot if you take them home on sale day!**

## WHAT'S A BULL WORTH? COWMAN'S FORMULA

Increase in pounds per calf from a top-performance bull

- X number of cows bred to him per year
  - X number of years to keep the bull
  - Expected selling price of calves
- = Additional dollars you can pay for a better bull

EXAMPLE: A bull who will add 30 lbs. to the weaning weight of each of his calves mated to 25 cows per year for four years and sell the calves for \$1.50/ pound.

$$30 \times 25 = 750 \times 4 = 3,000 \times 1.50 = \$4,500$$

*\*\* This bull is worth \$4,500 more than the average bull who will keep your weaning weights the same. Take this formula and put your own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving - easy, high quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.*

When they say the 'power is in the blood', that literally could not be more true than right here. Four of the six Angus bulls are out of the May 85 cow in this offering. A full sister to this bull was very successfully shown by Colton Kleinschmidt. She was named Supreme Champion Female many times, including the Nebraska Cattlemen's Classic Jr Show. No matter what this cow is mated to, it flat clicks. Study this bull from the ground up, he is big footed, soft pasterned, smooth and flexible in his joints. He is long bodied and still maintains the extra depth of rib. Long and cool in his front and does not lack for performance. It really will not matter what type or breed of cow you will mate this one to, you will come out ahead. He has two full brothers and one maternal brother in the sale. All are a little different but ALL are really good. You get to choose the best one for your program. These bulls will not disappoint you by means of performance, power, muscle, structure or look. They will all sire bulls, replacement females and feeder calves with lots of quality and pounds.

The May 85 cow has done an awesome job for us, no matter what the matings have been. This First-N-Goal bull has been good all summer long. From the ground up, he is built right. Big footed, great structured, lots of eye appeal and full of muscle from end to end. He is another bull that needs lots of consideration if you are looking to raise bulls or females of high quality. This bull will put that extra look and performance in your next crop of calves.

This bull is bred as good as you can get. You might say that he is a herd builder. This is only the third calf out of this cow, the others both being heifers. One we sold and the other we have kept back for ourselves. The 4209 cow is going to get flushed this year. This is an easy fleshing bull with length and depth of body. Athletic on the move and a great hip in him. We could see this bull making an incredible set of heifers. Smooth shouldered and well balanced. An easy bull to like.

The dam to this bull needs no introduction. She is the dam to all of the Lut bulls we have raised in the past. This will be one of the last chances to get a hold of her offspring. We are about out of embryos on her. This bull is incredibly stout made with a huge top. We love how deep ribbed and easy fleshing he is. We have offered very few females out of this cow family because of the incredible job they have done for us. His maternal brothers have done an awesome job for their new owners. Style himself has hit home runs all across the country. This bull is no exception to that and we expect that he can and will carry on the same tradition. If you are raising purebred stock or commercial cattle, this bull can take you to the next level. Put extra \*stars\* beside this bull.

Full brother to the Lot 1 bull. This guy is a little different in style and kind compared to Lot 1, but really good. He is super deep bodied. Has a big stout square hip and is still so smooth through his front and shoulders. Real sound and good jointed with plenty of muscle. If a person was looking to make those really good purebred show steers, this guy would be the ticket. Honestly, of all three of the full brothers that are here in the sale, we do not know which is the best one. You will have to be the judge as to which one best fits your program.

Cattlemen pay attention here. We actually hoped this calf was going to be a heifer to replace his mother after her many years here. No such luck. We have been fortunate to have raised bulls out of her that we have kept in our pastures and wow the replacement heifers they have produced. Many heifers have also sold on the top end of our sales. This bull is maternally bred and certainly does not lack for performance. He come right off of a twelve-year-old cow with an actual weight of 883#. Pound maker, female maker all in one package. Big footed and ultra sound.

Folks, when a mating works it works and that has been the case for us here. This bull is a little younger but he is special. We did sell a full brother to this bull last year at the National Western in Denver. We had two full sisters, one was in our sale this last fall and the other sold on Core/Boyer sale in Iowa. This one may be the best one of them all. Ultra sound, big ribbed, big hiped, and ultra good looking. His maternal brother sells as lot 17 and is a half-blood Simmy. This bull was raised in a satellite herd and therefore we did not get an exact weaning weight. But without a doubt he has exploded since then. The value of the dam to these bulls goes up every year. Her offspring have been getting the job done. This bull has an awesome disposition just as his mother did. Take him home with confidence.

We have always had the philosophy that behind every good calf is a really good cow. That could not be more true than right here. We sold a maternal sib purebred heifer to this bull that was the Reserve Champion Purebred Simmental a couple years ago at the Ohio State Fair. Most recently a maternal brother was the Supreme Champion Bull at the 2018 Nebraska State Fair and continued on to the American Royal at Kansas City where he was crowned the Reserve Champion Purebred Simmental Bull. His sire, Loaded Up is one of the hottest Simmy bulls being used and with all good reason. If you want to make your own mark in the purebred industry, this bull would sure surface to the top. Good looking, stout built and sound.

If we could get twins to look like this and perform like this every time, we might be all about it. Granted, we did draft one of them onto another cow for the betterment of both calf and the cow. Still this is a really cool pair of bulls. Relentless has done an excellent job at our place. These bulls are maternal brothers to the lot 14 bull. There are some differences between these twins. Lot 16 is a little more moderate in frame and very easy fleshing. Lot 15 has a little more growth and is a little longer bodied. Both bulls are excellent on the move, big footed and smooth jointed. They have plenty of power when you get behind them. You make the decision as to which one best suits you or take them both home and turn them out together. Either way, you will not go wrong.

From the very get go we knew that we had something extra special with this guy. This is the natural calf of this donor female. She is also the dam to the lot 8 bull. This is the first time that this cow has been mated to a simmy bull. We have her bred right back the same way, excited for calving season to get here. This bull has a big foot like a clydesdale and can move as graceful as one. He is easy fleshing, stout made and has plenty of performance. We can only imagine the set of baldies he will produce. His dam won a championship banner in Louisville a few years ago. We actually raised the bull that she is sired by and he went back to the Harrietta cow herself. We have had this cow family around for several generations simply because they get their job done. If you are looking for performance and maternal in one package, it can be found right here in this bull.

This guy is maternally bred. We have had several full sibs. It has been a very successful mating for both heifers and bulls. This bull has flat turned it on since we brought him home. It will be fun to run him across the scale to see how much he has gained. Every time we walk out through the bulls and see him at a distance we ask ourselves - what bull is that? Probably the best way to describe this bull is complete. He has the right amount of muscle and is extremely flexible on the move. Not only will these Broker sired cattle give you performance, they will make awesome females too. His dam is a beautifully uddered cow. We may get to sounding like a broken record but we believe in these bulls and try to describe them to you the way we see them and know them.

The dam to this bull is one good beast. That is why she made a donor cow after just her first calf. She was actually raised by Jeff Holmes and he told us that we needed to own half of her with him and he was right. There are three bulls in the sale out of her. Lot 21 is a full brother and lot 24 a maternal brother. There really is not a lot to not say about this bull as he is just a complete individual. This bull has done nothing but exploded since we brought him home from weaning. We have lots of confidence in this mating and this bull.

If there is a Broker son out there that could make a calving ease bull, this one sure could be the one. His mother, no matter what she has been mated to, takes the birth weight out of her progeny. He still does not lack for performance. At 12 years old she still weaned off a 772# calf. Actually we were hoping to get a heifer to keep one last replacement out of this cow. We have kept every heifer this cow has had and put them back in the herd. This bull is so nice headed and smooth shouldered that we would not be afraid to turn him out on heifers.

Another really nice bull out of our Irish Whiskey donor. A younger bull not to over look here. We really like our Steel Force cattle of which we have several of. The mating of Steel Force to Irish Whiskey and then add Lutton in there is a great maternal combination. This bull is a little more moderate in frame and is easy fleshing. He has plenty of eye appeal and a heifer maker deluxe. We wish that he was just a little older and at the same maturity level as the older bulls in the sale. You will not even think that this is the same bull at turn out time.

 OHL 4101

This Wheel Man semen was hard to get a hold of but we were fortunate that we did. These cattle have eye appeal and gainability. This bull is maternally bred and his Friction sired momma produces exceptionally well. Study this bull from the ground up as he is so big footed and sound. Athletic on the move with a smooth shoulder and is deep bodied. If you took a picture of his mother and of her udder, that is the what we expect them to look like. Another bull that would be awesome to turn out on a set of Angus or Baldy cows to make females and pounds.

This just might be as impressive as it gets. Twin brothers. Lot 28 had an actual weight of 862# this fall that adjusts to a 205 day weight of 813#. Lot 29 had an actual weight of 902# adjusting to a 205 day weight of 848#. Those are just the facts, the most impressive part is that they were born to a first calf heifer. Lot 29 was raised on his mother and lot 28 was raised by another first calf heifer. When you build anything you have to start with a solid foundation and these two boys have it. Both structurally and genetically. Their granddam is a Duffs New Edition. Her natural bull calves have topped our bull sale a couple different times. One of them going to California to a Simmental breeder that reports back those are some of the best calves he has raised. Maternal and performance all in one package and times two. You pick which bull would work best for your program. If you can not decide, take them both home. They will get the job done right.

We felt very fortunate to get the dam to this bull purchased and to have her in our pasture to look at all the time. We purchased her from Sullivan Farms as a bred heifer. She was named the Champion Lo Percent Simmy female in the Jr show at Kansas City for Sara Sullivan. After her first calf she went to the donor pen. She was flushed and bred back right away to calve up close this spring. Her bull calf was sired by a calving ease Brilliance son and here he is. He should be a calving ease bull himself. He also performed well or should we say momma did her job weaning him off with an AWW of 795#. We can foresee this bull producing some baldies that you will not be disappointed in. He is deep bodied with an awesome structure. Like we say, every great calf has a great cow to back him up. His mother is a good one!

The dam to this bull has been an awesome producer. We purchased her as a calf from Kelvin Jorgensen. Pretty sure Kelvin may not have let her go if he would have known what her future production outcome was going to be like. She has never failed us in any sort of the way. This cow raised our high selling bull a couple years ago and she is the granddam to Lots 28 and 29, the twins. We have kept every daughter back in our herd. We could go on and on about this bull, his sire and his dam and their skeletal makeup but we are not going to. You can see that for yourself in his picture and video and then come see him in real life. One word says it all, he is GOOD. We know that a couple of the bulls in the offering are a little younger. The reason that they are being offered is because they are high quality bulls backed by high quality dams. We believe in them and their ability to make you money. If this bull was one of the first ones to be born here, he may very well be the most sought after and high seller. We should have just named him Confidence.

We thought long and hard about keeping this bull and using him ourselves, but have decided to offer him for sale to you now. His sire was a staple herd sire in our program for years and we are sad to see him go. On the bottom side he's backed by one of the most consistent cow families we have. A maternal sister to this guy's dam, Farrah 15W, was named the Reserve Champion Percentage Female at the 2010 AJSA National Classic and has turned into quite the successful donor in our program. This halfblood Simmental bull is flashy and attractive through his neck, shoulder and brisket. I really like the muscle and shape he possesses, but his feet and legs are what really set him apart. Bulls with this bone circumference and foot size that still move like this don't come around every day.

There's not a pedigree at the UCC that has more consistently produced champions in the heifer world than this one. This is a promotional quality bull who's sisters have proven the quality and consistency this pedigree is capable of. They have won at all levels, from jackpot shows to Louisville and Denver and have now gone on to become leading donors in our customer's programs. Regardless of his pedigree, this bull is high quality stock. This bull has the right amount of muscle, shape and look to produce high quality show stock of all levels.

 CRAFT CHEYENNE 1397-028

We have had really good luck with our SMA Watchout 482 calves and you'll be hearing a lot more about this sire in the Angus breed. I can't tell you how much I like this bull. His dam is an extremely high quality Double Black from the Conley program that raises the good stuff every year. He is super attractive in his profile, with enough muscle and shape to produce bulls and heifers alike. I love this bulls body and structure and the way he ties high out of the topline of his shoulder.

Here's another really good fall bull with the genetics and performance to be a big time asset to any operation. This Profit son is stout and square over his hip and top and is very robust in his rib design. This is a really well balanced smooth shouldered bull with the genetic backing to take your calf crop to the next level. These  $\frac{3}{4}$  Simmental bulls are very versatile in their ability to be bred to make pure-bred and percentage cattle of high quality alike.

# EFFECTIVE *easy* BREEDING

VitaFerm® Concept•Aid® is a line of vitamin and mineral supplements for beef cattle formulated to promote effective, easy breeding when fed 60 days pre-calving through 60 days post-breeding. High concentrations of vitamin E and organic trace minerals, coupled with the Amaferm® advantage, supports quick repair of the reproductive tract and more energy for reproductive success. Additionally, increased nutrient absorption and digestion leads to healthier and heavier calves giving you performance that pays.
